

Orchard Competency Module

Boost inspection-readiness with tools to track and document lab testing operator proficiency.

As an optional add-on to Orchard® Enterprise Lab™ or Orchard® Point-of-Care™, the Orchard Competency module helps lab managers and point-of-care coordinators create, assess, and track training and competency evaluations for laboratory personnel and POCT end users. The module can be used to develop and auto-deliver custom quizzes and checklists to ensure that training and competency requirements are met and that lab testing is being performed by certified individuals.

Improve Efficiency of Lab Personnel Certifications

- Create and deliver custom quizzes and checklists to employees
- Set up operator auto-recertification
- Eliminate paper tracking of competency assessments
- Offer operators immediate feedback for questions

**Always be
confident
that your
laboratory's
competency
requirements
are up to date.**

Enable Standardized & Convenient Training for Multiple Topics

- Provide web-based user-friendly access to training materials and quizzes
- Create lab-specific or general quizzes and checklists (e.g., fire, OSHA, safety, etc.)

Create, assign, and track custom quizzes and checklists

Automate operator recertification for testing devices

Provide automatic feedback and documentation for assessments

Automate Your Competency Review Process

- Auto assign to operators
- Eliminate manual processes (e.g., certification updates, quiz grading, etc.)
- Define criteria for recertification
 - ✓ Testing a patient
 - ✓ Performing QC
 - ✓ Performing proficiency testing

Call us today for a demonstration of how the Orchard Competency module can help prepare your lab for inspection and ensure operator efficiency!
